

Report on Expenditures per Capita

May 2006

Department of Local Government Finance

STATE OF INDIANA

DEPARTMENT OF LOCAL GOVERNMENT FINANCE

INDIANA GOVERNMENT CENTER NORTH
100 NORTH SENATE AVENUE N1058(B)
INDIANAPOLIS, IN 46204
PHONE (317) 232-3777
FAX (317) 232-8779

To: Governor Mitchell E. Daniels, Jr.

From: Melissa K. Henson, Commissioner
Department of Local Government Finance

Copy: Members of the Indiana General Assembly

Date: May 1, 2006

Subject: Report on Expenditures per Capita

The attached Expenditures per Capita report is filed in accordance with IC 6-1.1-33.5-7. The report, prepared by the Department's Division of Operations and Data Analysis, presents a compilation of each political subdivision's expenditure per capita based on 2005 information reported on the Annual Financial Report filed with the State Board of Accounts. Data was compiled by the type of political subdivision, namely counties, townships, city/towns, schools, libraries, special units, conservancy districts and consolidated city-county (Uni-gov - Marion County).

Indiana Code calls for a report that includes each political subdivision's total amount of expenditures per person based on the most recent federal decennial census and based on the information prepared; the Department has determined the highest, lowest, median and average expenditures per person for each political subdivision.

Overview of the Expenditure per Person Report

The purpose of this report is to provide an annual compilation of each political subdivision's total amount of expenditures per person. This initial report is based on 2005 expenditure information provided by each political subdivision. The Federal Census Bureau provided population data for all political subdivisions, except schools and libraries. Population data for schools were provided by the Indiana Department of Education. The Indiana State Library provided population data for libraries.

The report includes the following categories of political subdivisions:

- Counties (91%)
- Townships (82%)
- City/Towns (79%)
- Schools (99%)
- Libraries (86%)
- Special Units (67%)
- Conservancies (54%)
- Consolidated City-County (Uni-gov – Marion County)

(Percentages reflect total percentage of each type of political subdivision that reported data.)

In order to compile the report, the Department asked that political subdivisions submit a copy of Parts 1 and 3 of the annual financial report routinely prepared for and submitted to the State Board of Accounts. Parts 1 and 3 of the annual financial report provide expenditure detail by fund and by classification. The Department acknowledges the assistance of the State Board of Accounts, the Department of Education, and the political subdivisions in providing information required for this report. It must be noted that the information contained in this report represents political subdivision actual 2005 calendar year expenditures that have not been audited by the State Board of Accounts. Note also that not all political subdivisions provided the requested data. For those political subdivisions that did not provide expenditure data, the per capita expenditure reflects "Data not provided." The wide variations in per capita spending within subdivision types suggest inconsistencies in how expenditure data is reported. The annual financial reports were reviewed to eliminate (where possible) obvious inconsistencies, such as investment purchases and fund transfers, to make comparisons

more meaningful. The Department plans to work with all parties on reporting consistency and providing timely data to improve the quality of subsequent reports.

As required by Indiana Code 6-1.1-33.5-7, the Department will file the report with the Governor and Members of the General Assembly. Individuals may view the report on the Department's website at www.in.gov/dlgf or may request a copy by writing to the Department at: Department of Local Government Finance, Division of Data Analysis, 100 North Senate Avenue, Room N1058, Indianapolis, IN 46204.

Counties

County government in Indiana is responsible for assessing property, recording deeds, providing sheriff services, holding elections, providing court services, providing welfare services, billing property taxes, and collecting property taxes. There are currently 92 counties in the State of Indiana and based on the most recent census data, counties range in population from 5,623 (Ohio County) to 860,454 (Marion County). However, due to the consolidated city-county government in Marion County, it is included in the consolidated city-county government portion of the report. The services provided by counties generally do not differ across the state; therefore, disparities are likely caused by various levels of current capital investment. The median expenditures per capita was \$929.94, the lowest was \$538.87 (Franklin County) and the highest was \$3,213.97 (Warren County)

Expenditures per capita are included on the following pages for all counties that provided the requested information. If a county did not provide information, the column reflects data not provided.

**County Expenditures Per Capita

Townships

Township government in Indiana is responsible for administering the township assistance program, assessing property, and providing fire protection (for unincorporated areas). There are currently 1008 townships in the State of Indiana and based on the most recent census data, townships range in population from 44 to 167,055. Consequently, the level of service depends greatly on the population and the type of township (rural vs. urban). For example, smaller rural townships tend to have volunteer fire departments while the larger townships in urban areas tend to have large full-time fire departments. With the ability to create fire protection districts and fire protection territories, many townships, cities and towns are joining forces to minimize operating costs and still provide essential fire protection services.

The Median Expenditures per Capita for townships was \$29.80, with the highest being \$736.48 and the lowest being \$1.77. Interestingly, the township with the smallest population, Wabash Township in Gibson County, had the highest expenditures per capita. The wide disparity between the highest and the lowest was likely caused by many factors. First, numerous townships have joined Fire Protection Districts or Fire Protection Territories, the fire expenditures for these townships was reported by the corresponding Fire Protection District or Territory and not the township. Also, some townships may have made a large capital expenditure, like purchasing a fire truck, with money in a cumulative fire fund that was established in anticipation of such an expense. Another factor causing the large disparity is the number of supplementary services provided by the township, such as Emergency Medical Service (EMS), library, park/recreation, and cemetery.

Expenditures per capita are included on the following pages for all townships that provided the requested information. The townships are grouped by county. The services that the township raises property taxes for are also included for reference. If a township did not provide information, the column reflects data not provided.

Cities/Towns

City/Town government in Indiana is responsible for police, fire protection, and planning. There are currently 563 cities and towns in the State of Indiana (excluding Indianapolis which is included in the Consolidated City-County and based on the most recent census data, city and town populations range from 1 (New Amsterdam Town) to 220,486 (Fort Wayne City). Consequently, the level of service depends greatly on the population and the needs of the city/town (rural vs. urban). For this reason Second Class Cities (ie. the 18 largest cities) have been broken out separately.

The Median Expenditures per Capita for Second Class Cities both the second class cities and all cities and towns are shown in the table below.

	Second Class Cities	All Cities/Towns
Median	\$2,867.79	\$1,270.61
Highest	\$5,446.49	\$39,674.88
Lowest	\$1,353.32	\$19.06

The wide disparity between the highest and the lowest was likely caused by many factors. First, numerous cities and towns in the state receive a large amount of Riverboat revenue. Also, some cities/towns provide utility services, such as electrical, water, wastewater/sewer, and trash removal, while others do not.. Expenditures for these services are included in the expenditures per capita data on the following pages. Services provided by each city/town have also been included. In addition, a city or town may have made a large capital expenditure, like purchasing a fire truck, with money in a cumulative fire fund that was established in anticipation of such an expense.

Expenditures per capita are included on the following pages for all cities/towns that provided the requested information. They are grouped by county, with cross county cities/towns shown in the county with the largest assessed value (ie. major county). If a city/town did not provide information, the column reflects "Data Not Provided."

Schools

School corporations in Indiana are responsible for educating children from kindergarten through grade 12. There are currently 293 school corporations in the State of Indiana which range in population from 220 (Prairie Township School Corporation) to 328,785 (Indianapolis Public School Corporation). Most school corporations also transport the children to and from school and provide necessary facilities, in addition to their education responsibilities.

School corporations are unique from other types of political subdivisions in that the number of people that they serve is really a subset of the entire population. Therefore, expenditures per student data are also provided. 2005-2006 school year student counts were utilized in the calculation of expenditures per student.

	Expenditures per capita	Expenditures per student
Median	\$1,686.44	\$9,951.24
Highest	\$3,301.00	\$19,991.10
Lowest	\$885.46	\$7,537.09

The disparity between the highest and the lowest was likely caused by two main factors. First, some school corporations have built new buildings in recent years to accommodate an increased number of students, and the resulting debt payments would result in higher expenditures. Secondly, the number of students with special needs varies widely between school corporations as would the expenditures necessary to educate those students.

Expenditures per capita and expenditures per student are included on the following pages for all school corporations that had provided expenditure data to Department of Education. They are grouped by county, with cross county school corporations shown in the county with the largest assessed value (ie. major county). If a school corporation did not provide information, the column reflects data not provided.

**Schools Expenditures Per Capita
(2005 Expenditures and 2000 Census Data)**

Per Capita Median:	1,686.44	Per Capita Lowest:	885.46	Per Student Median:	9,951.24	Per Student Lowest:	7,537.09
Per Capita Average:	1,777.52	Per Capita Highest:	3,301.00	Per Student Average:	10,409.55	Per Student Highest:	19,991.10

Libraries

Libraries in Indiana provide books, magazines, newspapers and other reference material to library patrons on a short term basis. Pursuant to IC 36-12-1-8(b), “public libraries provide free library services for all individuals in order to meet the education, informational and recreational interests and needs of the public.” There are currently 240 libraries in the State of Indiana and based on the most recent census data, libraries serve populations ranging 241 to 832,693. Libraries are generally created by city or county officials and have boards appointed by the government that created them. With the relatively recent expansion of technology, libraries have increasingly been relied upon to provide computer and internet capabilities.

The Median Expenditures per Capita for libraries was \$64.40, with the highest being \$340.74 and the lowest being \$9.79. The wide disparity between the highest and the lowest was likely caused primarily by the hours of service and the number and location of branches. Like other types of political subdivisions, large capital expenditures may distort the expenditures per capita incurred by a particular library.

Expenditures per capita are included on the following pages for all libraries that provided the requested information and were in existence for the entire calendar 2005 year. In order to make finding a particular library easier, they are grouped by county. If a library crosses county boundaries, it is only included in the county with the largest assessed value. If a library did not provide information, the column reflects data not provided.

**Library Expenditures Per Capita
(2005 Expenditures and 2000 Census Data)**

Special Districts

Needs for governmental services that are not met by counties, townships, cities, towns, schools or libraries, are often met with a special unit type named Special Districts. The main types of Special Districts are:

- Solid Waste District
- Airport Authority
- Fire Protection District
- Transportation District
- Water District

Every county except Marion is either part of a multi-county solid waste district or has its own solid waste district. Therefore, determining the population for the solid waste districts and comparing the various solid waste districts is straightforward. For other types of Special Districts, determining the population is difficult as is comparing the districts to one another. For this reason, the solid waste districts are broken out separately for easier comparison.

There are currently 65 solid waste districts in the State of Indiana and based on the most recent census data, solid waste districts serve populations ranging 8,419 to 1,171,395. The Median Expenditures per Capita for solid waste districts was \$9.47, with the highest being \$46.18 and the lowest being \$0.46.

Expenditures per capita are included on the following pages for all solid waste districts that provided the requested information. The solid waste districts are sorted by county, the major county (ie. the county with the largest assessed value) was used for multi-county solid waste districts. If a solid waste district did not provide information, the column reflects data not provided. The multi-county solid waste districts and the counties that they serve are:

- Three Rivers Solid Waste District (Henry, Fayette, & Rush)
- Northwest Indiana Solid Waste District (Jasper, Benton, Carroll, Newton, Pulaski, & White)
- Southeastern Indiana Solid Waste District (Jefferson, Franklin, Jennings, Ohio, Ripley, Scott, & Switzerland)

- West Central Solid Waste District (Hendricks, Montgomery, Morgan, Parke, & Putnam)
- East Central Solid Waste District (Madison, Delaware, & Grant)
- Northeast Indiana Solid Waste District (Steuben, Dekalb, Lagrange, & Noble)
- Wildcat Creek Solid Waste District (Tippecanoe & Clinton)
- Clay-Owen-Vigo Solid Waste District (Vigo, Clay, & Owen)
- W. U. R. Solid Waste District (Union & Wayne)

Following the expenditures per capita for the solid waste districts, the 2005 total expenditures are listed for the other types of special units.

This page intentionally left blank.

Conservancies

Conservancy districts in Indiana are established for a multitude of purposes, such as flood prevention and control, improving draining, providing irrigation and developing forests, wildlife areas, parks and other recreational facilities in connection with water management to name a few. Conservancy districts are unique because they are established through the local court and are not handled the same way as other political subdivisions. While conservancy districts have definite boundaries for taxation purposes, the U. S. Census Bureau does not track population within their boundaries. Therefore, the data provided in this report is total expenditure per conservancy district.

Expenditures are included on the following pages for all conservancy districts that provided the requested information. The conservancy districts are grouped by county. If a conservancy district crosses county boundaries, the information is listed in the county with the greatest assessed value (ie. the major county). If a conservancy did not provide information, the column reflects data not provided.

Consolidated City-County (Uni-gov)

Indianapolis and Marion County have a consolidated city-county form of government commonly referred to as Uni-gov. In addition to providing typical city services, police protection, fire protection, planning, Uni-gov also provides sanitation services (both liquid and solid), transportation services (commonly referred to as IndyGo), health and hospital services, and airport services. The population for Indianapolis as of the 2000 census was 781,870. The 2005 expenditures reported for Uni-gov was \$794,697,309.52. This calculates to expenditures per capita of \$1,016.41. Interestingly, the expenditures per capita for Uni-gov were less than all of the second-class cities and less than the median for all cities and towns, even with the additional services.

Marion County reported expenditures of \$76,444,664.50, using the 2000 census of 860,454, the expenditures per capita are calculated to be \$88.84. Because Marion County as its own entity does not provide health and local road and street, like other counties it was difficult to compare to other counties.
